TECH & SKILLS

- ❖ **Programming** : JavaScript , Java , C++
- ❖ **DSA Skills** : Basics & Intermediate DSA , Familiar with Advance DSA
- ❖ **Frontend-Technology** : HTML5 , CSS3 , JavaScript , ReactJS , Redux , BOOTSTRAP , MUI
- ❖ **Database** : SQL , Firebase
- ❖ **Developer Tools and Technologies** : VS Code , Git & GitHub
- ❖ **Backend-Technology** : Familiar with Node.js , Express , MongoDB

PROJECTS

Movies and TV Series Searching App

[Live Here](#) | [Code](#)

- ❖ **Intro**-It is similar to OTT Platform like Netflix , Hotstar , MX player etc. where users can watch the movies and TV series
- ❖ **Features**-This platform provides **searching and filtering options** . We can search the movies and TV series by its name. People can also filter the movies and TV series by its genre's name(drama,horror ,etc)
- ❖ **Tech used**- React.JS , HTML , CSS , MUI , Routing , Axios , React Alice Carousel , React Hooks. MovieDB API(The Movie Database) is using for fetching the data from backend .

Job-Place (Like Naukri.com , Angelist etc)

[Live Here](#) | [Code](#)

- ❖ **Intro**-It is similar Job Portal websites like Naukari.com , AngeList , etc where candidate can **search & apply the job** and valid employee can **post the job** .
- ❖ **Features**-On this portal , Candidate can apply whatever job they want and valid employee has **authentication to post the job**. Authentication System has been implemented using Google Auth of Firebase.There is **no chat service provided on other websites** like AngeList, Monster etc. **But Here one to one Chat Service is providing** between candidate and employee . Here Firebase is using for chat service
- ❖ **Tech used**-ReactJS , HTML , CSS , JavaScript, MUI , Firebase , React Hooks are using .For backend service firebase technology is being used.

Live Weather App

[Live Here](#) | [Code](#)

- ❖ **Intro**-It is a Weather-App .Here we can know current weather condition of any place.
- ❖ **Features**-People can know **current weather condition** of any place of our world **using searching technique**
- ❖ **Tech used**-HTML , CSS , JavaScript has been used to make this project.WeatherAPI (openweathermap API) is using for fetch the data of current weather condition

Todo-App

[Live Here](#) | [Code](#)

- ❖ **Intro**-ToDo List App is a kind of app that generally used to maintain our day-to-day tasks or list everything that we have to do.
- ❖ **Features**-In this App, we can **perform add, delete, edit and remove all operation on task**. Local storage will be being used so that all of our data will be stored in our browser .Even if we close the window , we won't be losing any data.
- ❖ **Tech used**- React.JS , HTML , CSS , JavaScript , React Hooks , Local Storage of browser .

EDUCATION

Aryabhatta Knowledge University, Patna

Bachelor of Technology in Computer Science

Aug 2017 -Sep 2021

7.43 CGPA

ACHIEVEMENTS

- Completed **Front-End Web Development** Course from Acciojob organisation in (2022)
- Completed **DSA Course** from Acciojob organisation in (2022)
- 500+ DSA Problems on [GFG](#) and [Acciojob](#) platform
